

Cynllun Adnoddau Coedwig Mynyddoedd Cambria - Systemau Rheoli Coedwigoedd (tudalen 5)

Cambrian Mountains Forest Resource Plan - Forest Management Systems (page 5)

Cynllun Adnoddau Coedwig Mynyddoedd Cambria - Systemau Rheoli Coedwigoedd (tudalen 6)

Cambrian Mountains Forest Resource Plan - Forest Management Systems (page 6)

- Ffin coedwig - Forest boundary
 - Ffordd y goedwig - Forest roads
 - Is-adrannau coedwig - Forest subcompartments
 - Afonydd a nentydd - Rivers and streams
- ### Systemau Rheoli Coedwigoedd - Forest Management Systems
- Heb ei aseainio, coed ifanc - Unassigned, young trees
 - Systemau Coedwriaeth Effaith Isel - Low Impact Silvicultural Systems
 - 2022-26 Torri coed - Fell
 - 2027-31 Torri coed - Fell
 - 2032-36 Torri coed - Fell
 - 2037-41 Torri coed - Fell
 - 2042-46 Torri coed - Fell
 - 2047-51 Torri coed - Fell
 - 2052-56 Torri coed - Fell
 - Ymyriad lleiaf - Minimum intervention
 - Cadw hirdymor - Long term retention
 - Gwarchodfa Naturiol - Natural Reserve
 - Tir agored - Open land

Adfer mawndir - Peatland restoration:

- Adfer mawndir - peatland restoration

Mae map Systemau Rheoli Coedwigoedd yn dangos sut rydym yn bwriadu rheoli'r gorchudd coed presennol. Mae'n dangos pa ardaloedd fydd yn cael eu rheoli gan ddefnyddio Systemau Coedwriaethol Effaith Isel. Nid yw bob amser yn bosibl gwneud hyn, yn aml oherwydd bod safleoedd ucheldir yn agored i ddifrod gan wynt. Lle bydd ardaloedd yn cael eu torri, dangosir yr amseriad bwriadedig ar gyfer clirdorri ar y map hwn. Er mwyn cynllunio ein busnes, rydym yn trefnu cynaeafu o fewn cyfnodau o bum mlynedd. Fel arfer caiff safleoedd wedi'u torri eu hailstocio â choed ifanc (neu eu caniatáu i adfywio'n naturiol). Eithriad i hyn yw lle mae adfer mawndir wedi'i gynllunio, yn unol â'n polisiau. Cofiwch nad yw'n bosibl dangos popeth ar far ap ar y raddfa hon. Am ragor o wybodaeth, cyfeirwch at y datganiad o Amcanion ar gyfer Cynllun Adnoddau Coedwig Mynyddoedd Cambria, sydd wedi'i gyhoeddi ar dudalen we Gofod Dinasyddion.

The Forest Management Systems map indicates how we intend to manage the existing tree cover. It shows which areas will be managed using Low Impact Silvicultural Systems. It is not always possible to do this, often because upland sites are vulnerable to wind damage. Where areas will be felled, the intended timing for clearfelling is shown on this map. To plan our business, we schedule harvesting within five-year periods. Felled sites are normally restocked with young trees (or allowed to regenerate naturally). An exception to this is where peatland restoration is planned, in accordance with our policies. Please keep in mind that it is not possible to show everything on a map at this scale. For more information please refer to the statement of Objectives for the Cambrian Mountains Forest Resource Plan, which is published on the Citizen Space webpage.
