

Proposed Objectives:

The following are the proposed objectives for the new woodland. We'd really like to hear your feedback on these objectives and which you think are the highest priority. You can provide this via the questionnaire which is linked below.

- Enhance **biodiversity** through creating, restoring and connecting habitats
- Maximise woodland **resilience** to future climate change
- Establish a safe, low-key, accessible, outdoor space for **recreation**
- Establish **community** involvement in the planning and management of the woodland
- Create a woodland that is in keeping with the Anglesey **landscape** character
- Create areas of coppice with high canopy trees, for forest **products** and rural crafts
